Perfil

Full-Stack Software Engineer with 2+ years of experience building real-world applications using Python, Java, and React. I've worked on end to end systems involving AI-driven features, data processing, and scalable REST APIs, taking products from idea to production.
I'm a fast learner, detail-oriented, and comfortable working across the full stack, delivering clean, reliable solutions in agile environments.

Work Experience

Fundación Bolívar Davivienda
March 2025 – September 2025

- Designed and optimized backend-driven search and filtering workflows for large-scale datasets.
- Applied AI techniques to improve relevance, accuracy, and performance of information retrieval.
- Contributed to scalable data-processing pipelines aligned with business requirements.
- Developed user-focused interfaces prioritizing usability and accessibility.
- Collaborated with cross-functional teams to deliver end-to-end software solutions.

Software Factory
2023 – 2024
Project: SOL – Sign Language Recognition System

- Developed an AI-powered backend using Python and Flask, exposing RESTful APIs for real-time sign language recognition.
- Implemented model inference services to process image and video inputs for Colombian Sign Language (LSC).
- Integrated computer vision pipelines using OpenCV and MediaPipe to extract key features for AI models.
- Designed backend workflows for request handling, prediction processing, and result delivery.
- Focused on scalability, performance, and maintainability of AI-driven backend services.
- Collaborated in agile teams, participating in planning, development, and code reviews.

Education

- **Software Analysis and Development Technologist**
  2025
- **Software Development Technician**
  2023

Technical Skills

Languages
- Python
- Java (Spring Boot)
- TypeScript / JavaScript

Backend & Databases
- RESTful APIs
- PostgreSQL
- Backend system design fundamentals

Frontend
- React + Vite
- Tailwind CSS
- Material UI

AI & Data
- AI applied to process automation
- Data analysis and processing
- Image processing (OpenCV, MediaPipe)

Tools & Practices
- Git & version control
- Agile development
- Code reviews & collaborative workflows

Languages

- English: Intermediate (B1–B2)
- Colombian Sign Language (LSC)
